Tuesday Toolsday: Win a BenchtopPRO Cleaner

February 12, 2013

Next Tuesday, we will be giving away a BenchtopPRO parts cleaner. This is a great tool for all homeowners, DIYers and mechanics. The BenchtopPRO is a parts-washing system that can clean years of gunk and grime off most anything from lawnmower blades to bicycle parts, and it works great on flea market treasures that you're planning on repurposing. To get everything so clean, the BenchtopPRO combines the process of bioremediation with a revolutionary non-flammable degreasing solution engineered to work at room temperature.

Did you know you could paint upholstered chairs, curtains, floors and even carpeting? While you can! We've got instructions on how to paint low-pile carpets. Also, find out how to revive furniture with paint, or a staircase, ceiling and more.

To win the BenchtopPRO, post a comment (click "comment" above) and tell us what these two pieces belong to. You don't have to answer correctly to win; we will randomly pick one winner.

On Tuesday, February 19, we will select the winner then start up a new giveaway for another tool, which will be given away the Tuesday after that. You have until February 19, 2013 at 2:00pm (ET) to enter to win the BenchTop Pro.
