ChemFree Clean and Green Parts and Tool Washer

February 8, 2013

The recently launched BenchtopPRO provides smaller shops with a parts washer option that cleans the dirtiest and greasiest parts without damaging the environment or the user's hands and clothes.

The BenchtopPRO is a bioremediating (self-cleaning solution) bench-top parts washer, which cleans dirty parts at room temperature.

The BenchtopPRO comes kit-complete with the following: The BenchtopPRO, the rugged, double walled unit with re-circulating pump and flow-through brush; one gallon of industrial-strength, non-hazardous concentrate BT5 degreasing solution; and four MicroPRO Packs, the microbial treatment with a healthy appetite for tough greases and oils.
