

The **PRO** Benchtop™

Safe • Strong • Storable

Defining parts washing
for the green generation

The BenchtopPRO combines the process of bioremediation with a revolutionary, non-flammable, degreasing solution engineered in our “dirt lab” to work at room temperature to tackle the most challenging parts washing needs – **even wax-based lubricants**.

FEATURES and BENEFITS:

- Uses Proven Technology borrowed from the “Big Guys”.
 - **SAFE** - The first bioremediating, bench top parts washer specially **engineered to clean at room temperature** - requires no heat.
 - **STRONG** - Over thousands are cleaning using this technology at their industrial-level repair shops, auto shops, bike shops and garages.
- No solvents means,
 - **NO GLOVES** -- Not corrosive to your hands or clothes like bleach or other solvents
 - **GREEN** and Non-hazardous unlike other solvents – no flashpoint, yet still cuts through toughest gunk
 - **NOT SMELLY** - no stinky work area
 - **NON-FLAMMABLE**
 - **SAFE TO STORE** when not using – just fasten the lid shut. It can even be stored upright.
- Quality-built using USA bioremediating technology
- Comes kit-complete – Everything you need is included!

In addition to the specially-designed sink unit with flow-through hose/brush, The BenchtopPRO System includes 1 gallon of industrial-strength, non-hazardous CONCENTRATE Degreasing Solution and 4 - MicroPRO Packs, the revolutionary microbial treatment that cleans itself in storage.

No Solvents Used - The FIRST Bioremediating Parts Washer that delivers “CLEAN & GREEN” parts at room temperature using technology formerly used only at Industrial Facilities.

HOW DOES IT WORK?

The Self-Contained Washing System's unique design and rock-solid construction creates an **EASY-TO-USE** and **EASY-TO-STORE** system.

1. Open the lid and prop it up using the inset wire rack to create a drying rack.
2. Start cleaning the parts with the hose and self-cleaning brush. The fluid and dirt drains from the sink into the receptacle below – and then it cleans itself with the degreasing and bioremediation solution.
3. **STORABLE** - Close it back up to use next time. It's now bioremediating and cleaning itself. **It can even be stored on its end with the fluid inside!**

The BenchtopPRO Unit Specifications:

- Roto Molded Construction
- Overall Dimensions: 25" L x 16" W x 12" H
- Inside Sink Dimensions: 17"L x 13"W x 5"H
- Pump Capacity: 12V 60Hz, 125 gph
- Brush/Hose: 2' Hose with flow-through, self-cleaning brush

BenchtopPRO Degreasing Solution:

- pH neutral
- Non-Hazardous
- Non-Flammable
- Non-Irritating
- Non-Caustic
- Bioremediating

MicroPRO Pack

- (4) ½ ounce microbial packets
